A stable shortlist can conceal an unstable headline

Each dot is a complete 2011-week resample; the full fit supplies the reference ranking.

Additive splines keep all three names in every resample. The first-place weather driver still changes in 6 of 12.

Diamonds: medians. Conditional training-history sensitivity; neither confidence intervals nor independent deployment trials.
Source: UCI 2011–2012 · 1,500 fixed test hours · five common within-month/hour/workday permutations.
